

Our educational teams will work with your school or district to help you:

- Analyze your school assessment data
- Determine if you are gathering the correct data
- Develop and train teams in your school to spearhead your school improvement process
- Decide on the best strategies for improving student achievement

### Research-based approach:

- Using Marzano’s research-based practices and “Plan, Do, Study, Act” system, we will help your school implement significant reforms.
- We train teachers in implementing data-driven instruction.
- U.S. students continue to score lower than students in other countries. Our international experience includes knowledge of instruction and accreditation from the top- ranking countries.
